

Welcome to the sixteenth edition of the Turolla quarterly newsletter. Well into the Fall Season we continue our fast forward pace, focusing on enlarging our product port folio and positioning Turolla through an innovative and refreshing appearance.

In this edition you will find news related to our home page, an open invitation to visit us at the upcoming Agritechnica Event in Hannover and finally an appetizer about a new concept within our SKP gear pump series.

Finally, as always, your valuable feedback is very much appreciated and welcomed – because your opinion matters!

So, for the next five “reading-minutes” – enjoy!

Best regards, Ulrik Krag - Manager Partner Companies Europe

Stay updated on our home page

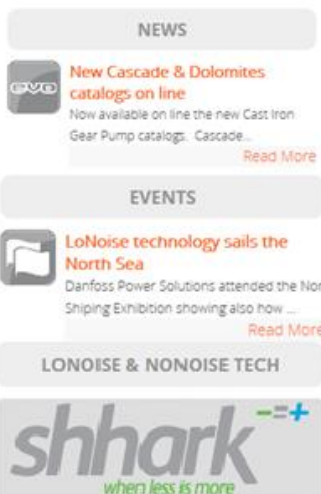

Behind our commitment to drive development forward with new products and solutions, we also focus on setting up the right support environment for our Partners.

Our homepage is one among many initiatives where the aim is to make it as interesting and relevant for you as possible.

The idea behind is quite simple: “Search and you shall find”!

Therefore, stay updated by frequently consulting our homepage for interesting news – you may discover new releases and inspiring articles!

Agritechnica 2015

The world's largest trade fair for agricultural machinery and equipment will take place in the start of November in Hannover, Germany. And like always, new innovations and solutions will be presented.

Together with Comatrol, Turolla will be present with its own specially designed exhibition stand – be prepared to be excited and enlightened!

Along with our new enlarged product portfolio you will find innovative solutions as well as latest news regarding our quiet technology – the *shhark*® and the *shhark*® *continuum*® pump series.

Also, further support material and documentation regarding some of our new products will be displayed at the Exhibition and available later, in the beginning of the new year, on our homepage.

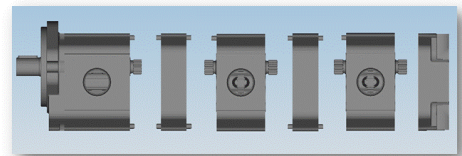

We hope to have awoken your curiosity and welcome you to visit our booth in Hall 17 - Stand F13 at the upcoming Agritechnica Event 2015.

New Flexible Pump Design Concept

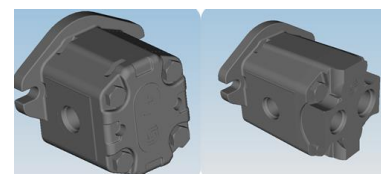

After years of successfully offering our SNP2 Modular Concept, we now are in phase to offer an additional flexible concept, this time with our SKP2 pump series as starting point.

The aim has been to develop a design that allows an easy conversion in the work shop as well as minimizing inventory further.

In short:

- SKP Group 2 displacements from 4-25ccm (0,24-1,54 in³/rev)
- Input drive: 9T, 11T, 15mm (5/8") and 19mm (3/4") straight key
- Front, rear and intermediate flanges are rotation independent (stock one set of components for both CW/CCW rotation)
- 2nd. and 3rd. sections are interchangeable
- All body sections have machined inlet passage for maximum flow between sections (triple with two inlets)
- Axial ports on the aluminium cover as an optional feature
- All sections have been submitted to cut-in so final testing procedure is not required

If you would like to know more about our new Flexible Pump Concept, please contact us for further assistance.
